

NORDEX

GREEN

PRODUCTS FOR THE FUTURE

NORDEXIA

THE SUSTAINABILITY OF THE FUTURE IS CIRCULAR

One of the most efficient ways to reduce carbon dioxide emissions is to use the renewable, plant-based raw products. The Nordex-Green series contains just that; completely vegan and natural ingredients. That is why all products in the Nordex Green series are Cradle-to-cradle certified at the gold level, and also Nordic Ecolabelled. 100% great - both for you and the environment.

NEW INNOVATIVE PRODUCTS

Nordex Green is the result of new thinking and innovation. We have put the environment in focus, without compromising on quality and performance. Nordex Green is a safe product choice where we as a supplier take full responsibility for the products' sustainability and quality, and by using the products you contribute to a more sustainable future!

NORDEXIA

FROM THE PLANTIC KINGDOM TO SUSTAINABLE, SWEDISH-PRODUCED PRODUCTS

The products are based entirely on ingredients that are durable, vegetable, renewable and 100% degradable. Both development and production take place in Sweden, which results in short transports and a reduction environmental impact.

All substances come from the plant and fruit kingdom

Perfumes and dyes are natural

The products are developed and produced in Sweden

ENVIRONMENTAL BENEFITS

- **All products are developed and manufactured in Sweden**
- **All raw materials come from plants or from fruit, including paint and perfume**
- **All products are organic**
- **All products are vegan**
- **New smarter shape on the bottles means that we reduce the transport volume by 14%**
- **All Nordex Green products are designed for a circular economy**

NORDEX GREEN meets the high demand and the high demands that the market has sustainable, environmentally friendly and at the same time highly efficient cleaning agents. The products meet the criteria that we have the right to demand from products in 2021!
